

Winsor Newton Varnish Information

I have recently found a line of varnishes that can be applied before the 6 month to 1 year made by Gamblin. The Winsor Newton Products below can not be applied before the 6 month to 1 year period of time.

Dammar

Been around the longest of current offerings. Will amber over time, dries to a high gloss and also can become brittle. It is best suited for a rigid support such as a panel.

Artist's Gloss Varnish

Solute with mineral spirits and is non yellowing.

Consery Art Gloss and Matt Varnishes

Gloss equals a gloss finish, Matt dries to a matt finish. You also may mix the two to get something in between gloss and matt. Easily removable for 100 years. Non yellowing.
